## DF Series | Disc Finishing Machines

Centrifugal Disc Finishing Machines are dedicated finishing systems for removal of strong burrs, intensive radiusing of small and mid-size parts as well as gently smoothing and high gloss polishing.

### Features:

1. Compact design suit for both wet and dry processing
2. Working barrel is lined inside with hot poured high wear-resistant polyurethane for protracting working life.
3. Tough bearing with high wear-resistant ceramic/tungsten alloy ring
4. Distinctive gap adjusting system
5. Variable frequency inverter Speed control for more option processing. Rotary in both clockwise and anti-clockwise.
6. Timer for repeatable precision processing.
7. Automatic water recycling device.

Model	Capacity (L)	Motor (kw)	Speed (rpm)	Size (mm)	Weight (kg)
DF20	20	0.75	450	720x800x1450	140
DF20/2	20x2	2x0.75	450	1180x800x1450	235
DF20/3	20x3	3x0.75	450	1700x800x1450	330
